

IMMERSION BLOCK HEATERS

ZEROSTART
HEATING PRODUCTS

Immersion heaters are the most efficient way to heat an engine during cold weather. The engine will be warmed in just 2 hours!

BENEFITS

- Ensures cold weather starting
- Environmentally friendly – no unburned fuel
- Reduces engine wear
- Quick, trouble-free installation

WHERE TO USE

- Automotive
- Heavy Duty Trucking
- Agricultural
- Industrial

HOW IT WORKS

- Provides warm air to the cylinders using thermo-siphon (thermal loop)
- Should be placed as low as possible in the engine block

IMMERSION BLOCK HEATERS

V-LOC™ LOCKING SYSTEM

V-LOC™ in fully open position, prior to tightening the locking bolt

V-LOC™ clamp spreads outward as the locking bolt is tightened

V-LOC™ in fully locked position. Heater is secured in the engine block

SPECIFICATIONS

- Plated stamped steel and forged brass adapters
- Copper heating element
- V-LOC™ locking system
- Replaceable cordset
- Captured, dual polymer O-Ring
- Design specifically for each application
