

SERIES 8000 CIRCULATION TANK HEATER

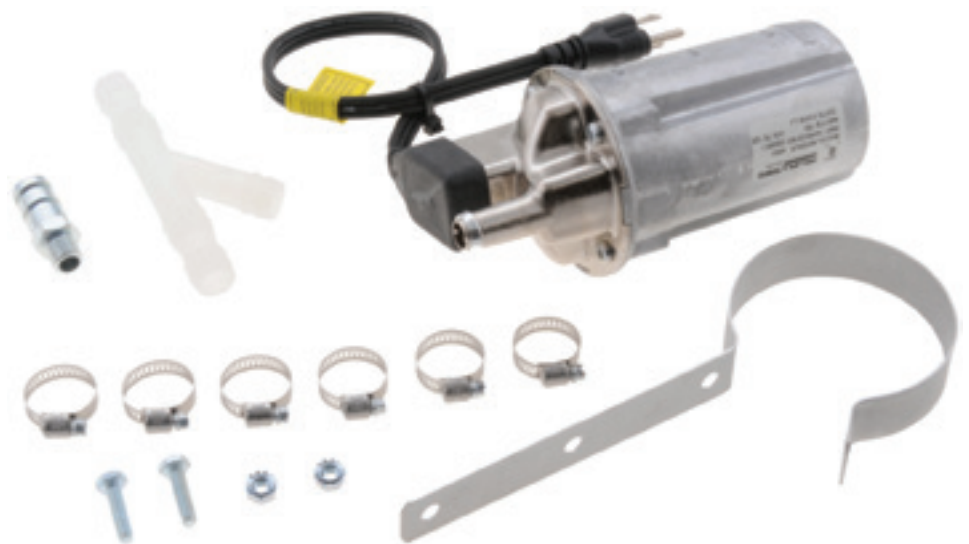

The Series 8000 circulation tank heaters provide dependable engine starts in all temperatures by circulating warmed coolant through the engine.

BENEFITS

- Provides a quick start
- Assures fast defrost
- Decreases engine emissions associated with cold starts
- Provides overheat protection
- Convenient, easy installation for new or retrofit applications
- Provides damage protection from road debris with top-side, detachable power cord
- Corrosion and impact resistance
- Flexible, supports extensive range of plumbing configurations

WHERE TO USE

- Light duty, off road, industrial and agricultural applications

FEATURES

- Die cast aluminum construction
- Copper heating element
- Standard 3-prong, 15 AMP plug
- Environmentally friendly materials such as recyclable aluminum, copper and plastic
- Replaceable, top-side power cord
- Offers 750W – 1500W with 5/8" (15.8mm) hose connections
- Temperature sensing thermostat
- Available in 120 voltage
- Universal mounting strap

SERIES 8000 CIRCULATION TANK HEATER

PART NUMBER DATA FOR 750-1500 WATT APPLICATIONS

Part No.	Watts	Voltage	Hose Connections Diameter
3308001	750	120	5/8"
3308002	1000	120	5/8"
3308003	1500	120	5/8"

*Series 8000 18" Replacement Cord – 3309001

**Series 8000 60" Replacement Cord – 3309002

OVERHEAT THERMOSTAT:

- Withstands overheat conditions without damaging heater or creating hazards
- De-energizes heater in overheat condition to protect components
- Measures temperature at heating element for quick response
- Tested for 100,000 cycles
