

The Start-Stop system with the Idle Free Series 5000 eAPU® for Mack Anthem

FEATURES

FUNCTIONALITY:

- Designed specifically to use with Idle Free Series 5000 eAPU for Mack Anthem
- Control switch built into the dashboard to enable/disable start stop feature
- Key off mode required to activate eAPU and Start-Stop technology
- Automatically monitors both the truck and eAPU batteries
- Allows automatic battery charging during extended periods such as 34-hour restart or mandatory rest periods
- Automatically starts Mack Anthem to idle and charges battery to full before turning off

HOW TO ORDER:

The Start-Stop kit is a dealer installed option for the Mack Anthem line installed Idle Free Series 5000 electric APU. Reach out to your nearest Mack dealer to inquire about aftermarket installations or ask about the Start-stop kit when specifying your Mack Anthem.

Reference part number 8710106 for the Idle Free Start-Stop kit.

Integrated technology to provide worry-free battery management and unlimited driver comfort for the long haul

BENEFITS:

- Provides reliable, uninterrupted rest and no delay on battery recharges
- Start-Stop addition to Mack Anthem for a high efficiency eAPU solution
- Ease of use with an on/off control switch installed on the dashboard
- Prevents a no-start situation for the Mack truck by automatically monitoring vehicle batteries
- Improved battery management extends the service life of the eAPU batteries
- Patented eAPU auto-restart starts the eAPU automatically following an auto start cycle that shuts the truck down
- Start-stop provides year-round auto restart independent of eAPU usage
