

Heat Magnet®

FEATURES

BENEFITS

- Heats, Thaws and Defrosts
- Universal mount attaches magnetically
- Thermostatically protected
- Quick grip handle allows you to easily place the heat magnet and protects hands from heat
- Small footprint allows for convenient placement

USES

- Assists in quick vehicle starts in cold winter temperatures, lessening engine wear.
- Also used for oil pans, transmissions, hydraulic equipment, steel gutters and stock tanks.
- Ideal heater for large or small (non-aluminum) engine blocks: tractors, snowmobiles, motorcycles, snow blowers, generators, and farm equipment.

The Heat Magnet warms up your vehicle when it is not running to keep your oil pan at optimum temperature.

200 Watt

300 Watt

Specifications	200 Watt	300 Watt
Cord Length	8 inches/0.6 ft	72 inches/6 ft
Applications	Suitable for small engines	Suitable for large engines
Thermostat Control	Does not exceed 250°F (121°C)	Does not exceed 266°F (130°C)
Wattage Density	18 watts/sq in	27 watts/sq in
Dimensions LxWxH (including handle)	4.4" (11 cm) x 2.5" (6.3 cm) x 3.0" (7.5 cm)	4.6" (11.6 cm) x 2.7" (6.9 cm) x 3.0" (7.5 cm)
Volts	120	120
Plug Type	NEMA 5-15	NEMA 5-15
Part No.	3400017	3400021
